CPT saves lives of your team!

Worldwide Patented Technology

(Patent Numbers: 2017263104, 3455577, 3,022,651, ZL201780026530.5, 126941, 262826, 10-1939038, 2681991, 10.352.672)

CPT is short for Cartridge Package Tactical. It is a new patented concept to pack ammunition, which allows the user to load ammunition into the magazine in a swift and fast way.

Step 1

Step 2

Step 3

The CPT is the answer to many challenges:

In numerous countries it's illegal to carry loaded magazines outside of the shooting range. Therefore the shooter can't load magazines ready at home and loading magazines on the range takes lots of valuable range time.

The CPT saves time at the range for both students and instructor. In an emergency or stressful situation, you can reload your magazines quickly. If you are short on magazines, the CPT allows you to keep operational. Easy to transport to the range

CPT solutions

You can buy CPT's on its own, and use them as a speed loader - load your CPT yourself at home to save time at the range – you can shoot while your friends are still loading magazines or,

You can also buy CPT's with ammunition from our ammunition factory partners, who you can find in our web pages

Users' statements:

“After months of using them multiple times (approx. 20-50) per unit, we found the product extremely good and suitable for our needs and also a very good innovation to Switzerland's market.”
Infinity Tactics, Switzerland

“There is no other product like this on the market and we strongly believe that this could be a game changer, by saving a load time, range time and money”

Military Police Special Unit, Brazil

“We understand from our experience that the CPT will have big and significant operational advantage when loading magazines”

Police Special Unit, Brazil
